

Soya Bean Oil

Suitable for feeding:

Crude Degummed Soya Bean Oil is a perfect complementary ingredient to a high energy ration due to its **high digestibility and metabolisable energy content**.

This liquid's **high Linoleic Acid** content makes it particularly well suited for use in monogastric diets.

Typical Analysis (DM Basis)

Physical Properties

	Solids (%)	Sugars (%)	Protein (%)	ME (MJ/Kg)	Litres (per tonne)	Viscosity (cps/20°C)
Great Britain	99	90 min	50-55	36	1085	500

? DID YOU KNOW?

When 1 tonne of soya beans is crushed, approximately 190kgs of Oil is produced.
